

The True Brew New album out 'NOW!'

***** Press Release (November 2018)

Sometimes it just works. One thing leads to another – and something good comes out at the end. That was how it happened with THE TRUE BREW.

THE TRUE BREW – that's Zvonimir Pervan (Vocals), Michael Reiß (Guitar), Michael 'Eumel' Aumer (Keyboards), Andreas Gmeinwieser (Drums) und Rainer Sobek (Bass). The five musicians from Straubing in Lower Bavaria have known each other for a long time and have already played together in various line-ups. And then they thought – why not play together in our own band?

The band name THE TRUE BREW is fitting. On the one hand it alludes to a liking for liquid brewery products not unusual among musicians; on the other, the name can also be interpreted as 'the perfect mixture', which refers to the diverse musical backgrounds and tastes of the band members. THE TRUE BREW sound is a fusion of hard rock, blues and folk, as well as jazz and funk and here and there a few elements of pop.

The first album from THE TRUE BREW is called 'NOW!' and contains eleven songs, all of them original compositions. Stylistically they range across '70s vintage rock ('Got The Choice'), AC/DC-style head-bangers ('Not Too Old For That') and heartstring-plucking blues ('Damned, It's Me'). Naturally ballads are also present; 'Should Have Tried Harder' will melt the heart of the most steadfast hard-rocker. Somewhat outside the normal rock categories are the folk-style pub-rocker 'Skye', with mandolins and accordion, and the seriously grooving funk-rocker 'B.I.M.P.' with its fat brass section and a guitar/Hammond organ solo duel, strongly reminiscent of Deep Purple. The opener 'Silent Echoes' burns itself into the brain after a single hearing, as does the relentless 'Real Rock'n'Roller', which Zvonimir Pervan und Rainer Sobek first let loose in concert halls back in the '80s with their former band, the legendary (at least in their East Bavarian homeland) Eclipse Of The Sun. The 2018 version of the song turns it up several notches further.

When is the right time to revive the good old hard-rock and blues of the late '70s and early '80s? THE TRUE BREW has an answer – 'NOW!'
